

Nadav Shitrit

Software Developer

Profile

Passionate and Curious Full-Stack Software Developer.

Knowledge in Desktop, Front-End and Back-End Development work.

With high motivation to learn new skills and tech.

Looking for the next challenge.

Employment History

Full-Stack Developer at Phoenix.

May 2022 — Now 📍 Givatayim

Experienced software developer with a focus on the insurance industry. Strong proficiency in .NET, Angular, and SQL technologies.

.Net frameworks, JavaScript, TypeScript and Angular, along with SQL DB utilizations. Integrated with featured 3rd party services. Implementing new features and fixing bugs in production env, I was enthused to be a significant developer in the team for different, small, and big projects and processes along the way.

Product Owner at Sanida.io

Dec 2022 — Dec 2023

Successfully led the transformation of the startup's product from ideation to production, meticulously aligning development processes with stakeholder requirements.

Managed project budgets and optimized resource allocation, ensuring cost-effective solutions while overseeing the successful deployment of the application.

Provided strong leadership to development teams, fostering a positive and collaborative work environment conducive to productivity and innovation.

Education

Sela College, Full Stack Software Developer

Nov 2020 — Nov 2021 📍 Ramat Gan

Completed an intensive one-year bootcamp in full-stack software development. Gained expertise in both server-side technologies, including .Net Core, .Net Framework, WPF, and ASP.NET Core, and client-side technologies such as Angular, React, JavaScript, HTML5, and CSS3. Acquired additional skills in MSSQL Server, Entity Framework, Docker, Azure, and web application security, including identity and role-based access control.

Open University, B.Sc. Computer Science student

2023 — Now

Currently pursuing a degree in Computer Science at the Open University, where I am building a strong foundation in core computing principles and practices. My coursework includes software development, algorithms, data structures, and systems programming. Through a flexible learning environment, I have honed my skills in self-discipline and time management, balancing rigorous academic challenges with practical projects. I am eager to apply my knowledge and problem-solving skills to real-world scenarios and contribute effectively to a dynamic team.
